

For the Final Exam

- You may bring a 3 X 5 handwritten card (both sides) with formulas and reminders only. No examples. This card is to be handed in with the exam with your name on it.
- Because there are multiple sections of this class taking the final no questions will be allowed during the exam unless there is a typo or you have a defective copy of the exam.
- Remember that multiple choice questions will not carry as much weight as the free response so prioritize
- Not only are you responsible for bringing a calculator but you must also make sure that you have a healthy set of batteries. You are also responsible for remembering how to use your calculator to solve problems that you have practiced this semester. I recommend putting any needed instructions on your note cards. Remember before you graph anything on your calculator that all plots need to be turned off. This means that your Y window should look like this:

Not like this:
